

[Name] [Last Name]
Full-Stack Developer for Data Platforms

email@example.com · +00 000 000 0000 · [City, Country] · linkedin.com/in/you · github.com/your-handle

Profile

Full-stack developer specialized in AI and data platforms. At COMPANY #1, I built an AI-driven procurement & spend-intelligence platform on GCP. At COMPANY #2, I delivered **dash-cass**, a FastAPI configuration service. I own features end-to-end and collaborate closely with ML teams and domain experts. Bilingual (Italian/English), working Dutch. Fully available after planned career break.

Impact Highlights

- **Data Ingestion Automation**: Eliminated manual onboarding/maintenance → self-service model with event-triggered workflows
- **Operational Efficiency**: Reduced onboarding time by 95% (48hr → 2hr) through PPV-informed automation
- **Cross-functional Delivery**: Partnered with ML team for backend integration and worked with domain experts on PPV implementation
- **Technical Leadership**: Secured CTO approval for architecture, coordinated implementation with stakeholders

Experience

COMPANY #1 (AI-driven procurement & spend-intelligence)

Mar 2023–Sep 2024

- Built full-stack features across Django/Celery backend and React/TypeScript dashboard on GCP
- Developed data ingestion pipeline (cat-ingestion, cat-data, cat-material) powering KPIs for enterprise customers
- Integrated Vertex AI pipelines: zero-shot part classification, BERT-based grouping, GPT-assisted tagging
- Collaborated with ML team for backend integration; worked with domain experts on PPV implementation

COMPANY #2 (AI-powered marketing-intelligence)

Aug 2022–Jan 2023

- Built **dash-cass**, FastAPI configuration service as single source of truth for account/pipeline configs
- Implemented JWT auth (python-jose), PostgreSQL (SQLAlchemy), Docker containers, Jenkins CI pipelines

CAREER BREAK

Oct 2024–Jul 2026

Planned break for health/family care. Maintained engineering skills (full-stack, GCP/Vertex AI, AI coding agents). Fully recovered and available.

Skills

Languages: Python, TypeScript, SQL (PostgreSQL, MySQL, BigQuery), Go, Java

Frontend: React 17, MUI, d3, ECharts, Tailwind, Firebase, Auth0

Backend: Django, FastAPI, Celery, SQLAlchemy, REST

Data & AI: Ingestion/ETL, Vertex AI pipelines, HuggingFace/BERT, GPT, Streamlit

Cloud: GCP (Cloud Run, BigQuery, Pub/Sub), Terraform, Docker, Jenkins

Tools: Figma, AI coding agents, pytest, Cypress

Languages: Italian (Native) | English (C1) | Dutch (A2)

Interests: AI & machine learning, software and game development, finance, Formula 1, photography, cooking.
