Profile

Full-stack software engineer specializing in AI-powered data platforms and backend systems. Experienced building scalable data ingestion pipelines, cloud-native services, and production AI workflows on Google Cloud using Python, React, Django, FastAPI, and Vertex AI. Comfortable owning features end-to-end while collaborating closely with ML engineers and domain experts. Native Italian, fluent English (C1), working Dutch (A2).

Experience

- Full-Stack Developer** AI-driven procurement & spend-intelligence Mar 2023 – Sep 2024
- Built production full-stack features using Django, Celery, React, TypeScript and Material UI on Google Cloud.
 - Designed and implemented a self-service data ingestion platform, replacing manual onboarding and maintenance with event-driven workflows.
 - Automated the Purchase Price Variance (PPV) lifecycle—from detection to resolution—reducing average resolution time from **48 hours to approximately 2 hours (95% improvement)** through real-time streaming, ML-based classification, and automated workflows.
 - Developed data ingestion services (*cat-ingestion*, *cat-data*, *cat-material*) powering procurement KPIs for enterprise customers.
 - Integrated Vertex AI models including zero-shot classification, BERT similarity grouping, and GPT-assisted product tagging.
 - Partnered with ML engineers to integrate production AI models and collaborated with procurement domain experts to translate complex business processes into scalable software.
 - Designed technical architecture for major platform initiatives, secured CTO approval, and coordinated implementation across engineering stakeholders.
- Full-Stack Developer Intern** AI-powered marketing intelligence platform Aug 2022 – Jan 2023
- Built a FastAPI configuration service serving as the single source of truth for account and pipeline configuration.
 - Containerized services with Docker and maintained Jenkins CI pipelines.
 - Improved deployment consistency by centralizing configuration management across internal services.

Career Break Oct 2024 – Jul 2026

Planned career break for family and health reasons while continuing to develop software engineering skills through personal projects. Fully recovered and available for full-time software engineering roles.

Skills

Languages: Python, TypeScript, SQL (PostgreSQL, MySQL, BigQuery), Go, Java
Frontend: React, Material UI, Tailwind CSS, D3.js, Apache ECharts, Firebase, Auth0
Backend: Django, FastAPI, Celery, SQLAlchemy, REST APIs
Data & AI: Data Ingestion, ETL Pipelines, Vertex AI, HuggingFace Transformers, BERT, GPT, Streamlit
Cloud: Google Cloud Platform (Cloud Run, BigQuery, Pub/Sub), Terraform, Docker, Jenkins
Tools: Git, Figma, pytest, Cypress, AI coding agents

Languages

Italian (Native)	English (C1)	Dutch (A2)
------------------	--------------	------------

Education

B.Sc. Computer Science (in progress)
University of Milan

Interests

Artificial Intelligence, Data Engineering, Software Architecture, Formula 1, Photography, Cooking, PC Hardware
